Hobbies and Interests

After my work day ends each day, I work on hobbies that are based on games. I am a PUBG mobile streamer on YouTube. I have a Strong attention to details and ability to concentrate on the games as well as studies. Apart from mobile games I play Badminton and Kabbadi. So now coming to programming when I get bored I work on Sql databases, why because I like working with MySQL. Now iam a well experienced in developing web applications using a framework and knowledge in relational databases, such as SQL
